#### DETAILED ACTION

- This application is a 371 of PCT/JP03/09010 filed 07/16/2003. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.
- The preliminary amendment filed 01/21/2005 has been entered. Claims 1-20 are currently pending with the application.
- The examiner has considered the IDS filed 01/21/2005 and 05/03/2006 and the documents cited by the PCT.

The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A (1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the examiner has cited by the references on form PTO-892 and/or the applicant/s have cited them on PTO-1449, they have not been considered.

#### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the Specification, Page-40, Table-3, UNDER 'Comp. Ex. 3' **DELETE** 'Flaky' and **REPLACE** with -Fiber-

### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: Claims 1-20 are allowed.

The closest prior art by Haruyama et al (JP 10-147891) teaches a conductive composition containing titania-flakes coated with a first layer of Sn-Sb-oxide and a second layer of SnO<sub>2</sub> (Abstract; Para-0020). The inherent presence of the flake size, flake thickness and the potassium content in the prior art composition could not be established with absolute certainty. DeLuca, Jr (US 6,706,109) teaches partly core free titania platelet pigments whose surfaces are coated with either colorless oxides such as tin oxide or colored oxides such as iron oxide (Cl-2, Ln 59-Cl-3, Ln 27; Cl-4, Ln 3-9). The claims are allowed over the unexpected superior data for the instant claimed compositions given in Table-3 of the specification (Pg-40) over their shape, size, thickness and the potassium content for the compositions. Prior art of record neither teaches nor fairly suggestive of applicant's composite flake of titania.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
